We Believe ARCC is Well Positioned to Take Advantage of the Structural Shifts in the Market

ARCC is the one of the largest direct lenders with the scale and capabilities necessary to successfully invest across a variety of market environments, including a downcycle.

**Market Opportunity**
- Evolution of credit markets expands opportunity
- Long-term change from bank retrenchment
- Structural shift from public to private capital

**Scale, Team & Capabilities**
- Large U.S. direct lender with $13.9 billion portfolio \(^{(1)}\)
- Highly experienced & tenured team
- Incumbency creates organic growth opportunities

**Attractive Portfolio**
- High quality portfolio that is diversified, defensive and senior-oriented
- Well positioned for changing markets

**Strong Balance Sheet**
- Deep sources of liquidity with committed sources of capital
- Focus on flexible, low cost funding sources

**Potential for Long Term Shareholder Value**
- Track record of generating strong returns to shareholders
- Compelling historical investment and credit performance

Past performance is not indicative of future results.

\(^{(1)}\) At fair value as of September 30, 2019.
Secular Trends Drive Opportunity in Direct Lending

Over the last 20 years, the non-bank lending markets have evolved, driven by several long running trends:

- Multidecade trends of bank consolidation has left a void for middle market companies
- Just as banks have retrenched, capital markets have also focused on larger borrowers, further expanding the middle market opportunity

(1) Source: Standard and Poor’s LCD Leveraged Lending Review Q2-19. Excludes left and right agent commitments (including administrative, syndication and documentation agent as well as arranger).

(2) Source: Public market follow on and IPO data per Refinitiv and PE transaction volume data per Preqin.

- Since 2009, the growth in private market equity deal volume has grown 20% per year, while the dollar volume of public market equity deal volume has shrunk
- 2015 was the first time more equity capital was raised than the IPO and follow on markets
Long Tenured & Highly Experienced Investment Team

ARCC has generated cumulative core earnings and net realized gains in excess of our dividends paid since our IPO.

**We have out-earned our dividend with cumulative core earnings plus net realized gains**

**Increased our regular quarterly dividend to $0.40 per share and declared an $0.08 additional dividend per share, to be distributed in four consecutive quarterly payments of $0.02 per share in 2019**

(1) As of September 30, 2019. There can be no assurance that dividends will continue to be paid at historic levels or at all. Past performance is not indicative of future results. Core Earnings is a non-GAAP financial measure. Core Earnings is the net increase (decrease) in stockholders’ equity resulting from operations less professional fees and other costs related to the American Capital Acquisition, expense reimbursement from Ares Capital Management LLC (the “Ares Reimbursement”), net realized and unrealized gains and losses, any capital gains incentive fees attributable to such net realized and unrealized gains and losses and any income taxes related to such net realized gains and losses. Net increase (decrease) in stockholders’ equity is the most directly comparable GAAP financial measure. Ares Capital believes that Core Earnings provides useful information to investors regarding financial performance because it is one method Ares Capital uses to measure its financial condition and results of operations. The presentation of this additional information is not meant to be considered in isolation or as a substitute for financial results prepared in accordance with GAAP. See Note 16 to Ares Capital’s consolidated financial statements included in the annual report on Form 10-K for the year ended December 31, 2018 for information regarding the American Capital Acquisition. See Note 13 to Ares Capital’s consolidated financial statements included in the annual report on Form 10-K for the year ended December 31, 2018 for information regarding the Ares Reimbursement.

Note: Our 2018 taxable spillover income was $0.80 per share.

1) The use of leverage magnifies the potential for gain or loss on the amount invested and may increase the risk of investment.

2) On June 21, 2018, ARCC’s Board of Directors approved the application to the Company of the 150% minimum asset coverage ratio set forth in Section 61(a)(2) of the Investment Company Act of 1940, as amended by the Small Business Credit Availability Act (“SBCAA”). As a result, the minimum asset coverage ratio applicable to the Company was reduced from 200% to 150% on June 21, 2019 (the effective date). Refer to Form 8-K filed on June 25, 2018 for additional important information.

3) Weighted average maturity of outstanding liabilities of 4.6 years vs. weighted average maturity of investments at fair value of 4.5 years. The weighted average maturity of investments at fair value excludes the investment in the subordinated certificates of the SDLP. The weighted average maturity of investments within the SDLP portfolio was 4.1 years.

Conclusion: ARCC’s Approach to Managing the Current Market

### Long Term Structural Positives
- Healthy demand trends from vibrant middle market companies
- Continued bank retrenchment
- Substantial private equity dry powder (~7x direct lending dry powder\(^1\))
- Significant level of equity contributions in structures

### Near Term Challenges in Current Environment
- Spreads have compressed
- Interest rate environment
- Debt to EBITDA multiples are elevated
- Covenants and documentation are weaker
- Significant new capital has formed, including new entrants with need to deploy capital in a limited timeframe

### Ares Capital’s Approach
- Seek to invest in leading, non-cyclical businesses with attractive growth prospects and high free cash flows
- Use direct origination and scale to provide greater influence on loan structures to maintain high selectivity
- Seek to be the lead lender with voting control to have the ability to impact outcomes
- Use incumbent positions to support growth of leading portfolio companies and enhance credit quality
- Be proactive managing investments and use our robust process to preserve capital and create value

ARCC Has Generated Realized Gains to Offset Losses

Active portfolio management and internal resources seek to protect downside and have generated net returns on the principal amount of investments across a variety of methods.

Our ability to successfully invest equity, acquire companies, structure loans and work out troubled investments has created ~$1,000 mm of net realized gains since our inception (1).

(1) From inception on October 8, 2004 through September 30, 2019. Excludes $196 million one-time gain on the acquisition of Allied Capital Corporation in Q2-10 and gains/losses from extinguishment of debt and other transactions.
Strong Investment Performance

ARCC has generated strong net realized gains relative to the BDC peer group

Annualized Net Realized Gain/Loss Rates
Since 2004 or IPO for ARCC and BDCs ≥$400 million market capitalization

ARCC as of September 30, 2019. BDC peer group as of June 30, 2019, as not all BDC peers have filed September 30, 2019 financial results as of November 1, 2019. Past performance is not indicative of future results.

(1) ARCC calculated as an average of the historical annual net realized gain/loss rates (where annual net realized gain/loss rate is calculated as the amount of net realized gains/losses for a particular period from Ares Capital IPO in October 2004 to September 30, 2019 divided by the average quarterly investments at amortized cost in such period). Excludes $196 million one-time gain on the acquisition of Allied Capital Corporation in Q2-10 and gains/losses from extinguishment of debt and sale of other assets. BDC peers calculated as an average of a BDC’s historical annual net realized gain/loss rates, where annual net realized gain/loss rate is calculated as the amount of net realized gains/losses for a particular period divided by the average quarterly investments at amortized cost in such period.

(2) The BDC peer group consists of BDCs with a market capitalization of $400 million or greater as June 30, 2019, who have been public for at least one year or who are under common management with a BDC that meets these criteria. This includes: AINV, BBDC, BKCC, CGBD, OCSI, OCSL, FSK, GBDC, GSBD, HTGC, MAIN, NMFC, PFLT, PNNT, PSEC, SLRC, SUNS, TCPC and TSLX.
ARCC’s Portfolio Has Generated Higher Returns with Less Risk

Our investment strategy and competitive advantages have led to attractive returns with lower volatility.

Deep and Diverse Access to Debt Financing

We believe that ARCC is a very efficient issuer of liabilities

- Significant access to long-dated, lower cost revolving debt facilities with up to 5 year terms
- Reduced pricing over time and continue to periodically extend maturities
- No “mark to market” financing

- Seasoned issuer in the institutional unsecured debt market, raising $7 billion in unsecured notes since 2011
- More than 100 investors have invested in ARCC’s Convertible and Investment Grade Notes
- Repaid $2.8 billion of unsecured notes since 2011

(1) Core Earnings is a non-GAAP financial measure. Core Earnings is the net increase (decrease) in stockholders’ equity resulting from operations less professional fees and other costs related to the American Capital Acquisition, expense reimbursement from Ares Capital Management LLC (the “Ares Reimbursement”), net realized and unrealized gains and losses, any capital gains incentive fees attributable to such net realized and unrealized gains and losses and any income taxes related to such net realized gains and losses. Net increase (decrease) in stockholders’ equity is the most directly comparable GAAP financial measure. Ares Capital believes that Core Earnings provides useful information to investors regarding financial performance because it is one method Ares Capital uses to measure its financial condition and results of operations. The presentation of this additional information is not meant to be considered in isolation or as a substitute for financial results prepared in accordance with GAAP.

(2) See Note 16 to Ares Capital's consolidated financial statements included in the annual report on Form 10-K for the year ended December 31, 2018 for information regarding the American Capital Acquisition.

Index & ETF Definitions
Index Definitions

Indices are provided for illustrative purposes only and not indicative of any investment. They have not been selected to represent appropriate benchmarks or targets for ARCC. Rather, the indices shown are provided solely to illustrate the performance of well known and widely recognized indices. Any comparisons herein of the investment performance of ARCC to an index are qualified as follows: (i) the volatility of such index will likely be materially different from that of ARCC; (ii) such index will, in many cases, employ different investment guidelines and criteria than ARCC and, therefore, holdings in ARCC will differ significantly from holdings of the securities that comprise such index and ARCC may invest in different asset classes altogether from the illustrative index, which may materially impact the performance of ARCC relative to the index; and (iii) the performance of such index is disclosed solely to allow for comparison on ARCC’s performance to that of a well known index. Comparisons to indices have limitations because indices have risk profiles, volatility, asset composition and other material characteristics that will differ from ARCC. The indices do not reflect the deduction of fees or expenses. You cannot invest directly in an index. No representation is being made as to the risk profile of any benchmark or index relative to the risk profile of ARCC. There can be no assurance that the future performance of any specific investment, or product will be profitable, equal any corresponding indicated historical performance, or be suitable for a portfolio.

1. The ICE BofA Merrill Lynch US High Yield Index ("H0A0") tracks the performance of US dollar denominated below investment grade corporate debt publicly issued in the US domestic market. Qualifying securities must have a below investment grade rating (based on an average of Moody’s, S&P and Fitch), at least 18 months to final maturity at the time of issuance, at least one year remaining term to final maturity as of the rebalancing date, a fixed coupon schedule and a minimum amount outstanding of $100 million. Index constituents are capitalization-weighted based on their current amount outstanding times the market price plus accrued interest. Accrued interest is calculated assuming next-day settlement. Cash flows from bond payments that are received during the month are retained in the index until the end of the month and then are removed as part of the rebalancing. Cash does not earn any reinvestment income while it is held in the index. The index is rebalanced on the last calendar day of the month, based on information available up to and including the third business day before the last business day of the month. No changes are made to constituent holdings other than on month end rebalancing dates. Inception date: August 31, 1986.

2. The Credit Suisse Institutional Leveraged Loan Index ("CSLLI") is designed to mirror the investable universe of the $US-denominated leveraged loan market. The index inception is January 1992. The index frequency is daily, weekly and monthly. New loans are added to the index on their effective date if they qualify according to the following criteria: 1) Loan facilities must be rated “SB” or lower. That is, the highest Moody’s/S&P ratings are Baa1/BB+ or Ba1/BBB+. If unrated, the initial spread level must be Libor plus 125 basis points or higher. 2) Only fully-funded term loan facilities are included. 3) The tenor must be at least one year. 4) Only fully-funded term loan facilities are included. 3) The tenor must be at least one year. 4) Issuers must be domiciled in developed countries; issuers from developing countries are excluded.

3. The Standard & Poor’s 500 Index ("S&P 500") is a market capitalization-weighted index of the 500 largest U.S. publicly traded companies. The S&P 500 is a float-weighted index, meaning company market capitalizations are adjusted by the number of shares available for public trading. The S&P 500 is considered to be a proxy of the U.S. equity market.

4. The SNL U.S. Registered Investment Companies Index includes all publicly traded (NYSE, NYSE American, Nasdaq, OTC) Regulated Investment Companies in SNL’s coverage universe. As of December 31, 2018, the index included 55 companies, including ARCC.

5. The KBW Nasdaq Bank Index ("BKX") is designed to track the performance of the leading banks and thrifts that are publicly traded in the U.S. The Index includes banking stocks representing the largest U.S. national money centers, regional banks and thrift institutions.

6. The S&P/LSTA Leveraged Loan Index ("S&P LSTA LLI") reflect the market-weighted performance of institutional leveraged loans in the U.S. loan market based upon real-time market weightings, spreads and interest payments. Facilities are eligible for inclusion in the index if they are senior secured institutional term loans with a minimum initial spread of 125 and term of one year. They are retired from the index when there is no bid posted on the facility for at least 12 successive weeks or when the loan is repaid.
**Slide 3: Market Leading Company in Direct Lending**

2. Based on market prices as of October 18, 2019. Dividend yield includes additional dividend of $0.02 per share to be paid quarterly in 2019.
3. Includes invested capital from inception on October 8, 2004 through September 30, 2019. Includes investments made through Ares Capital Corporation, the Senior Secured Loan Program and the Senior Direct Lending Program. Excludes syndications within one year of origination, $1.8 billion of investments acquired from Allied Capital on April 1, 2010 and $2.5 billion of investments acquired from American Capital on January 3, 2017.
4. Based on original cash invested, net of syndications, of approximately $26.6 billion and total proceeds from such exited investments of approximately $33.9 billion from inception on October 8, 2004 through September 30, 2019. Internal rate of return (“IRR”) is the discount rate that makes the net present value of all cash flows related to a particular investment equal to zero. Internal rate of return is gross of management fees and expenses related to investments as these fees and expenses are not allocable to specific investments. The effect of such management and other expenses may reduce, maybe materially, the IRR’s shown herein. Investments are considered to be exited when the original investment objective has been achieved through the receipt of cash and/or non-cash consideration upon the repayment of Ares Capital Corporation’s debt investment or sale of an investment, or through the determination that no further consideration was collectible and, thus, a loss may have been realized. These IRR results are historical results relating to Ares Capital Corporation’s past performance and are not necessarily indicative of future results, the achievement of which cannot be assured.

Slide 11: ARCC Has Delivered Compelling Long Term Performance

1. Calculated as the average spread between ARCC’s yield on debt and income producing securities and the yield on the S&P LSTA Leveraged Loan Index and ICE of BofAML US High Yield Index (“H0A0”) from 2013 to Q3-2019.
2. Includes invested capital from inception on October 8, 2004 through September 30, 2019. Includes investments made through Ares Capital Corporation, the Senior Secured Loan Program and the Senior Direct Lending Program. Excludes sales within one year of origination, $1.8 billion of investments acquired from Allied Capital on April 1, 2010 and $2.5 billion of investments acquired from American Capital on January 3, 2017.
3. Calculated as an average of the historical annual net realized gain/loss rates (where annual net realized gain/loss rate is calculated as the amount of net realized gains/losses for a particular period from Ares Capital IPO in October 2004 to September 30, 2019 divided by the average quarterly investments at amortized cost in such period). Excludes $196 million one-time gain on the acquisition of Allied Capital Corporation in Q2-10 and gains/losses from extinguishment of debt and other transactions.
4. Based on original cash invested, net of syndications, of approximately $26.6 billion and total proceeds from such exited investments of approximately $33.9 billion from inception on October 8, 2004 through September 30, 2019. Internal rate of return (“IRR”) is the discount rate that makes the net present value of all cash flows related to a particular investment equal to zero. These IRR results are historical results relating to Ares Capital Corporation’s past performance and are not necessarily indicative of future results, the achievement of which cannot be assured.
5. Analysis includes externally managed BDCs with market capitalizations of at least $400 million or greater as of June 30, 2019, which have been publicly listed for 5 years: AINV, BBDC, BKCC, FSK, GBDC, HTGC, MAIN, NMFC, OCSI, OCSI, PFLT, PNNT, PSEC, SLRC, SUNS, TCPC, and TSLX. GAAP ROE is measured by net income divided by average equity over the five year period ended June 30, 2019.
6. Source: SNL Financial. As of September 30, 2019. Ares Capital Corporation’s stock price-based total return is calculated assuming dividends are reinvested at the end of the day stock price on the relevant quarterly ex-dividend dates. Total return is calculated assuming investors did not participate in Ares Capital Corporation’s rights offering issuance as of March 20, 2008.
7. As of September 30, 2019. S&P 500 returns measured by the S&P 500 Index, which measures the performance of the large-cap segment of the market. The S&P 500 is considered to be a proxy of the U.S. equity market and is composed of 500 constituent companies. BDC returns measured by SNL U.S. Registered Investment Companies (RICs) Index, which includes all publicly traded (NYSE, NYSE American, NASDAQ, OTC) Regulated Investment Companies in SNL’s coverage universe. Bank returns measured by the KBW Nasdaq Bank Index (BXX), which is a modified market capitalization weighted index designed to track the performance of leading banks and thrifts that are publicly traded in the U.S. The BXX index includes banking stocks representing large U.S. national money centers, regional banks and thrift institutions.

**Slide 12: Sustained Market Premium Yield for ARCC with Lower Losses**

1. The weighted average yield on debt and other income producing securities is computed as (a) annual stated interest rate or yield earned plus the net annual amortization of original issue discount and market discount or premium earned on accruing debt and other income producing securities, divided by (b) total accruing debt and other income producing securities at fair value.

2. The S&P/LSTA Leveraged Loan Index is a market value-weighted index designed to measure the performance of the U.S. leveraged loan market based upon market weightings, spreads and interest payments. Term loans from syndicated credits must meet the following criteria at issuance in order to be eligible for inclusion in the index: senior secured, minimum initial term of one year, US dollar denominated, minimum initial spread of LIBOR + 125 basis points, $50M initially funded loans. Inception date: January 1, 1997.

3. The ICE BofAML US High Yield Index (“H0A0”) tracks the performance of US dollar denominated below investment grade corporate debt publicly issued in the US domestic market. Qualifying securities must have a below investment grade rating (based on an average of Moody’s, S&P and Fitch), at least 18 months to final maturity at the time of issuance, at least one year remaining term to final maturity as of the rebalancing date, a fixed coupon schedule and a minimum amount outstanding of $100 million. Index constituents are capitalization-weighted based on their current amount outstanding times the market price plus accrued interest. Inception date: August 31, 1986.

4. Represents ARCC’s average quarterly non-accrual rate at amortized cost from inception in October 8, 2004 to September 30, 2019.

6. Calculated as an average of the historical annual net realized gain/loss rates (where annual net realized gain/loss rate is calculated as the amount of net realized gains/losses for a particular period from Ares Capital IPO in October 2004 to September 30, 2019 divided by the average quarterly investments at amortized cost in such period). Excludes realized gains/losses from the extinguishment of debt and other transactions.

**Slide 13: ARCC Has a Compelling Track Record of Credit Performance**

1. Includes invested capital from inception on October 8, 2004 through June 30, 2019. Includes investments made through Ares Capital Corporation, the Senior Secured Loan Program and the Senior Direct Lending Program. Excludes syndications within one year of origination, $1.8 billion of investments acquired from Allied Capital on April 1, 2010 and $2.5 billion of investments acquired from American Capital on January 3, 2017.

2. Defined as total gains/(losses) on assets with a payment default as a percentage of total invested capital since inception, divided by number of years since inception for all first lien loans. For realized investments, this number includes interest, fees, principal proceeds, and related expenses. For unrealized investments, this number includes interest, principal proceeds, fees and related expenses received to-date, as well as the fair market value of the security as determined by the Manager in accordance with U.S. generally accepted accounting principles. Total proceeds represents total cash proceeds received from first lien debt investments as of June 30, 2019. For realized investments, this number includes interest, principal proceeds, fees and related expenses. For unrealized investments, this number includes interest, principal proceeds, fees and related expenses received to-date.

3. Defined as total gains/(losses) on assets with a payment default as a percentage of total invested capital since inception, divided by number of years since inception for all second lien and subordinated loans. For realized investments, this number includes interest, fees, principal proceeds, and related expenses. For unrealized investments, this number includes interest, principal proceeds, fees and related expenses received to-date, as well as the fair market value of the security as determined by the Manager in accordance with U.S. generally accepted accounting principles. Total proceeds represents total cash proceeds received from second lien and subordinated debt investments as of June 30, 2019. For realized investments, this number includes interest, principal proceeds, fees and related expenses. For unrealized investments, this number includes interest, principal proceeds, fees and related expenses received to-date.

Slide 26: Deep and Diverse Access to Debt Financing

1. Subject to borrowing base, leverage and other restrictions. Represents total aggregate amount committed or outstanding, as applicable, under such instrument.
2. Effective stated rate as of September 30, 2019.
3. Requires periodic payments of interest and may require repayments of a portion of the outstanding principal once their respective reinvestment periods end but prior to the applicable stated maturity.
4. The interest rate charged on the Revolving Credit Facility is based on an applicable spread of either 1.75% or 1.875% over LIBOR or 0.75% or 0.875% over an “alternate base rate” (as defined in the agreements governing the Revolving Credit Facility), in each case, determined monthly based on the total amount of borrowing base relative to the total commitments of the Revolving Credit Facility and other debt, if any, secured by the same collateral as the Revolving Credit Facility. As of September 30, 2019, the interest rate in effect was LIBOR plus 1.75%. The Revolving Credit Facility consists of a $674 million term loan tranche with a stated maturity date of March 30, 2024 and a $2,691 million revolving tranche. For the revolving tranche, the end of the revolving period and the stated maturity date are March 30, 2023 and March 30, 2024, respectively. Subsequent to the end of this reinvestment period and prior to the stated maturity date of March 30, 2024, Ares Capital is required to repay outstanding principal amounts under both the term loan tranche and revolving tranche on a monthly basis in an amount equal to 1/12th of the outstanding principal amount at the end of the revolving period.
5. The interest rate charged on the Revolving Funding Facility is based on LIBOR plus 2.00% per annum or a “base rate” (as defined in the agreements governing the Revolving Funding Facility) plus 1.00% per annum. The end of the reinvestment period and the stated maturity date for the Revolving Funding Facility are January 3, 2022 and January 3, 2024, respectively. Subsequent to the end of this reinvestment period and prior to the stated maturity date of January 3, 2024, any principal proceeds from sales and repayments of loan assets held by Ares Capital CP Funding LLC will be used to repay the aggregate principal amount outstanding.
6. The interest rate charged on the SMBC Funding Facility is based on an applicable spread of either 1.75% or 2.00% over LIBOR or 0.75% or 1.00% over a “base rate” (as defined in the agreements governing the SMBC Funding Facility), in each case, determined monthly based on the amount of the average borrowings outstanding under the SMBC Funding Facility. As of September 30, 2019, the interest rate in effect was LIBOR plus 1.75%. The end of the reinvestment period and the stated maturity date for the SMBC Funding Facility are September 10, 2022 and September 10, 2024, respectively. Subsequent to the end of this reinvestment period and prior to the stated maturity date of September 10, 2024, any principal proceeds from sales and repayments of loan assets held by our consolidated subsidiary, Ares Capital JB Funding LLC, will be used to repay the aggregate principal amount outstanding.
7. Assumes all committed capital is fully drawn. In December 2017, Ares Capital entered into an interest rate swap agreement to effectively fix the interest rate in connection with the $395 million term loan tranche of the Revolving Credit Facility. The stated interest rate for the Revolving Credit Facility reflects the fixed interest rate of 2.064% plus the applicable spread of 1.75%, or 3.814% on the term loan tranche.
